

## Objective

To land a role developing non trivial mobile applications as part of a multi-disciplinary team.

## Skills

Javascript, Reactjs, AngularJS, Bootstrap, React Native, Redux, Reactotron, sqlite, Nodejs, Amazon Web Services, VIM, CSS, Transition animations, keyframe animations, basic photoshop, Chrome Devtools, Mobile Responsive Design, lodash, Box Model, webpack, SASS, stylus, JIRA, Kanban

## Experience

June 2018 - PRESENT

**Litt, New York, NY** - *Founder* - <https://getlitt.app/>

- Developed social application that allow users to quickly crowdsource events.
- Using Django as the backend on kubernetes and google cloud platform. Application was developed in React Native and works on Android and iOS
- Also act as technical consultant for other React Native projects in NYC.

March 2018 - June 2018

**Huge inc., New York, NY** - *Creative Engineer* - <https://hugeinc.com/>

- Owned development for an immersive pop-up shop in Kobe, Japan.
- Implemented application on Amazon Web Services using Express and communicated with client over Websocket.
- Application used React/Redux with fullscreen background animations and CSS animations

February 2016 - February 2018

**Capsule Corp, New York, NY** - *Fullstack Software Engineer* - <http://capsulecares.com/>

- Early Engineer inheriting a React webapp. Added small functionality within a day.
- Improved landing page first interactive page time from 80 seconds to 13 seconds over 3G.
- Added Segment.io events recording user actions for improving our conversion funnel.
- Elicited requirements and implemented large parts of a non-trivial internal employee workflow application used by over 80 people daily to perform their work.
- Inherited and extended a Node.js application that performed SQL query reflection from a GET request to a query against a Microsoft SQL database within a corporate network.

September 2015 - November 2015

**Sous, New York, NY** - *FullStack Software Engineer* - <http://sousapp.com/>

- Developed a team centric communications iOS app for restaurants with built-in supply ordering and payment using React Native, Redux and Meteor.js.
- Performed devops work using ssh and pm2 to manage the Node.js backend on AWS.
- Acquired by Bluecart Inc.

2012 - 2015

**Various Projects, San Francisco, CA** - *Software Engineer*

- Worked on early versions of <http://freecodecamp.com> using Node.js and MongoDB.
- Built out MVP in Ruby On Rails for a customer engagement startup
- Built out MVP in Ruby On Rails and JQuery for a professional networking site for artists
- Developed application for monetization optimization tool for small businesses

## Education

2015

**MongoDB University New York, NY** - *M101JS: MongoDB for Node.js Developers*

Completed work modeling problems using a document database. Concepts like determining nesting based off read access patterns and data sharding using a distributed datastore. [Certificate](#).

2008 - 2012

**Worcester Polytechnic Institute, Worcester, MA** - *Bachelor's in Computer Science*

Completed coursework in Computer Networks, Databases, Web Applications, Calculus, Algorithms, Linear Algebra, Statistics, Artificial Intelligence, Data Mining, Software Development, Object Oriented Design, Functional Programming and Operating Systems.

## Open Source Projects

- [React Native Contacts](#) - the most popular module for loading phone contacts in React. Written in Javascript, Objective-C and Java.
- [karp-rabin-search NPM module](#) - a Javascript module implementing fingerprint search algorithm.

## Groups

- Founder at [KaggleNYC](#)
